---

Atlanta, GA

**2013 Update**

**AIDSVu**

# About AIDSVu

**AIDSVu** is a compilation of interactive, online maps that allows users to visually explore the HIV epidemic in the U.S. alongside critical resources such as HIV testing and treatment center locations.

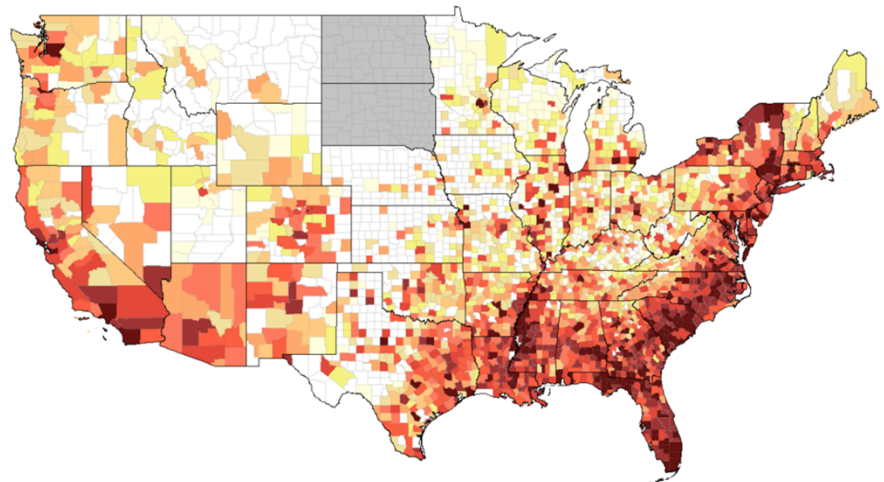

**AIDSVu**'s mission is to make HIV prevalence data widely accessible and locally relevant.

**AIDSVu** provides users with an intuitive, visual way to connect with complex information about persons living with an HIV diagnosis at national, state and local levels.

# Caveats & Limitations of AIDSVu Maps

- Data on AIDSVu may differ from data released in state and local HIV surveillance reports.
- Maps are inclusive of incarcerated persons and should be interpreted with caution.
- AIDSVu maps do not reflect undiagnosed cases.
- Caution should be exercised when comparing maps because the scales change when viewing data overall and by race/ethnicity, sex and age group breakdowns.
