About AIDSVu

AIDSVu is a compilation of interactive, online maps that allows users to visually explore the HIV epidemic in the U.S. alongside critical resources such as HIV testing and treatment center locations.

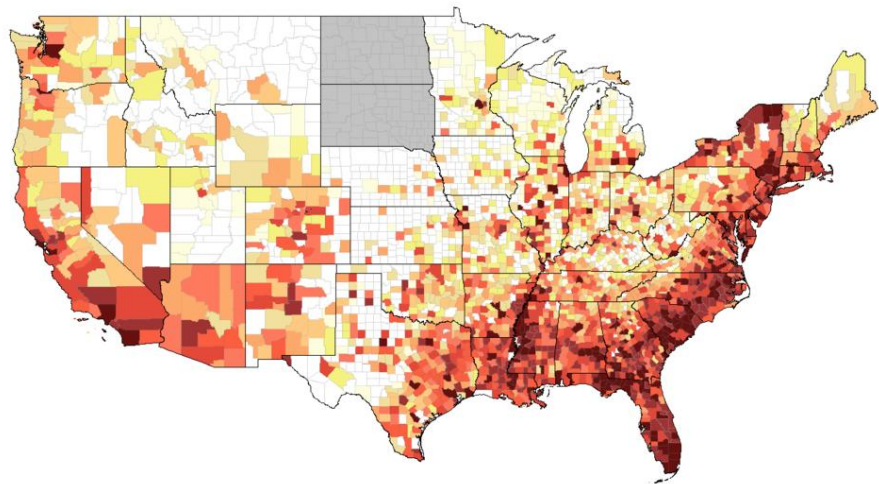

AIDSVu's mission is to make HIV prevalence data widely accessible and locally relevant.

AIDSVu provides users with an intuitive, visual way to connect with complex information about persons living with an HIV diagnosis at national, state and local levels.

The map displays the city of Washington, DC, with various streets and landmarks labeled. Red icons, representing HIV treatment sites, are scattered across the city. Notable locations include the National Mall and Memorial Parks, the US Marine Corps War Memorial, and the United States Capitol Complex. The map also shows major highways like I-495 and I-265. The interface includes a search bar at the top left, a search button, and a list of search results on the left side. The map itself has a zoom control on the left and a 'Map'/'Satellite' toggle at the top right.

Caveats & Limitations of AIDSVu Maps

- Data on AIDSVu may differ from data released in state and local HIV surveillance reports.
- Maps are inclusive of incarcerated persons and should be interpreted with caution.
- AIDSVu maps do not reflect undiagnosed cases.
- Caution should be exercised when comparing maps because the scales change when viewing data overall and by race/ethnicity, sex and age group breakdowns.
