

AIDSVu UNDERSTAND **HIV** WHERE YOU LIVE

AIDSVu is a compilation of interactive online maps that display HIV prevalence data at the national, state and local levels, allowing users to filter by different demographics, including age, race and sex. The maps pinpoint areas of the country where the rates of people living with an HIV diagnosis are the highest, allowing us to better understand where the needs for prevention, testing and treatment services are the most urgent. **AIDSVu** also offers users HIV testing and HIV treatment locators. **AIDSVu** is presented by the Rollins School of Public Health at Emory University in partnership with Gilead Sciences, Inc.

HIV PREVALENCE IN THE U.S.

PERSONS LIVING WITH AN HIV OR AIDS DIAGNOSIS, 2010

MORE THAN
1.1 MILLION
PEOPLE IN THE UNITED STATES
ARE LIVING WITH
HIV INFECTION,
AND ALMOST **1 IN 6** (15.8%)
ARE UNAWARE OF THEIR INFECTION.

FIND YOUR LOCAL TESTING SITE AT
AIDSVU.ORG/TESTING

AIDSVu DATA CAN ALSO BE VISUALIZED BY:

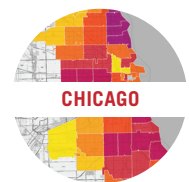

- Race/ethnicity, sex and age
- Transmission category
- New diagnoses
- Alongside social determinants of health – such as poverty, high school education, median household income, income inequality and people without health insurance

ATLANTA

NEW YORK

CHICAGO
