

Understand HIV Where You Live

AIDSVu is an interactive online platform that visualizes data on the HIV epidemic across the United States.

AIDSVu's mission is to make HIV-related data widely available, easily accessible & locally relevant to inform public health decision making and empower people to end the HIV epidemic in their communities. The platform visualizes data, presents insights, and catalyzes research to drive public health action across the U.S.

Using data from the Centers for Disease Control and Prevention (CDC), state and local health departments, and other high-quality sources, AIDSVu is a trusted resource for public health officials, policymakers, health care providers, researchers, and the general public.

AIDSVu is presented by Emory University's Rollins School of Public Health in partnership with Gilead Sciences, Inc. and the Center for AIDS Research at Emory University (CFAR).

THE HIV CARE CONTINUUM

AIDSVu has state- and city-level maps illustrating the steps of the HIV care continuum, a series of indicators used to measure the steps a person living with HIV takes from diagnosis through successful treatment with HIV medication.

NEW HIV DIAGNOSES

0 - 39	40 - 53	54 - 70	71 - 90	91 - 113
114 - 143	144 - 183	184 - 238	239 - 338	339+

Individuals who received a new HIV diagnosis between 2014-2018.

LATE HIV DIAGNOSES

0 - 14	15 - 17	18 - 18	19 - 20	21 - 22
23 - 23	24 - 26	27 - 29	30 - 34	35+

Individuals diagnosed with stage 3 HIV (AIDS) within 3 months of an initial HIV diagnosis between 2014-2018.

LINKAGE TO HIV CARE

0 - 56	57 - 62	63 - 65	66 - 69	70 - 72
73 - 75	76 - 79	80 - 83	84 - 91	92+

Individuals who visited an HIV health care provider within 1 month of being diagnosed with HIV between 2014-2018.

RECEIPT OF HIV CARE

0 - 61	62 - 68	69 - 73	74 - 76	77 - 79
80 - 81	82 - 83	84 - 86	87 - 90	91+

Individuals living with diagnosed HIV who received medical care for HIV in 2018.

VIRAL SUPPRESSION

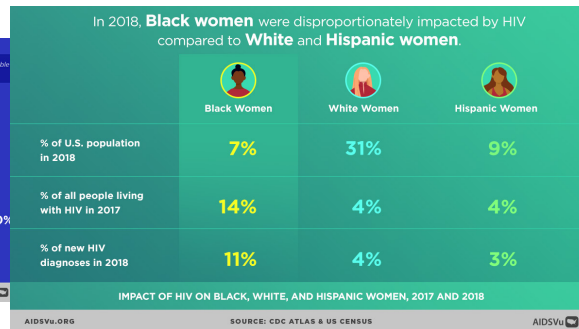

0 - 47	48 - 54	55 - 58	59 - 62	63 - 64
65 - 67	68 - 70	71 - 74	75 - 79	80+

Individuals living with diagnosed HIV who had a low or undetectable viral load (the amount of HIV in the blood) in 2018.

UTILIZE AIDSVu'S EASY-TO-USE TOOLS IN YOUR WORK

Share educational infographics with your networks

Customize and print maps at the state, county, and ZIP Code-level, and view data by race/ethnicity, sex, age, and transmission category

Download data sets for research and analysis

View side-by-side maps of social determinants of health, such as poverty and high school education

Use service locators to find HIV testing sites, PrEP providers, and Ryan White HIV/AIDS medical providers. Additional service locators for the Deep South include: stigma reduction services, overdose prevention services, harm reduction services, and trauma-informed care

Explore national, regional, state, county, and city profiles with local statistics, including profiles for the 57 jurisdictions of the Ending the HIV Epidemic (EHE) initiative

TESTING. CARE. PREVENTION.
